Contents

Preface **iii**

1 Arithmetic Reconsidered **1**
1.1 Units . . . 1
1.2 Exponentiation . . . 6
1.3 Arrays and Data types . . . 10
1.4 Search Algorithms . . . 18

2 Modern Precalculus **27**
2.1 Sorting Algorithms . . . 27
2.2 Principle of Induction . . . 27
2.3 Hash Functions . . . 27
2.4 Computational Complexity . . . 27

3 Calculus **29**
3.1 Definite Integrals . . . 29
3.2 Fundamental Theorem of Calculus . . . 29
3.3 Newtonian Mechanics . . . 30
3.4 Div, Grad, and Curl . . . 30
3.5 Maxwell's Equations . . . 30

4 Maps and Spaces **31**
4.1 Vectorization . . . 31
4.2 Differentiable Programming . . . 31
4.3 Fields and Vector Spaces . . . 31
4.4 Bras, Kets, and Homs . . . 31
4.5 Quantum Mechanics . . . 31

A Appendix: Basic Terminology **33**

Bibliography **37**

Index **39**
